PROFESSIONAL SUMMARY

Software developer with experience in building backend systems and full-stack applications using Java and Spring Boot, along with foundational knowledge of machine learning and data-driven development. Familiar with RESTful APIs, authentication mechanisms, and structured data workflows, with exposure to model preprocessing, evaluation, and basic learning algorithms. Has worked on integrating external services and designing modular architectures, with growing interest in Large Language Models, retrieval-based systems, and intelligent application design.

TECHNICAL SKILLS

Programming Languages: Java, Python (basic), JavaScript, SQL

Backend & Frameworks: Spring Boot, Spring MVC, Node.js, Express.js, REST APIs

AI/ML & Data: Machine Learning Fundamentals, Data Preprocessing, Model Evaluation, Pandas, NumPy (basic), Scikit-learn (basic)

Web Technologies: HTML, CSS, React.js, Tailwind CSS

Databases & Systems: MySQL, MongoDB, Redis (basic understanding)

Tools & Platforms: Git, GitHub, Postman, Docker (basic), VS Code

Concepts: Data Structures & Algorithms, OOP, DBMS, OS, SDLC, API Design

EXPERIENCE

Java Developer Intern

JSpiders Training Institute — Rajajinagar, Bengaluru

Jan 2026 – Present

- Completed 200+ hours of intensive hands-on training in Core Java, OOP principles, Data Structures & Algorithms, SDLC, and Agile methodologies.
- Solved 150+ DSA problems, improving coding efficiency and proficiency.
- Done 3+ real-world full-stack applications using Java, Spring, Spring Boot, and REST APIs.
- Designed and tested 15+ RESTful APIs, achieving consistent response times under 300ms during local testing.
- Gained practical experience with relational databases (Oracle SQL, MySQL), writing 50+ optimal queries for data retrieval and manipulation.
- Participated in Agile-based development cycles, contributing to sprint planning, code reviews, and iterative feature delivery.
- Improved debugging and code optimization skills, reducing runtime errors in projects by ~30%.

PROJECT

Jspiders - Book My Ticket – Online Movie Ticket Booking System

Tech Stack: Java, Spring Boot, Spring MVC, JPA, Hibernate, Thymeleaf, MySQL

- Developed a full-stack application with role-based access control for Admin and User workflows
- Designed and implemented 15+ RESTful APIs for booking, user management, and show scheduling
- Engineered a real-time seat allocation system to prevent double booking and ensure data consistency
- Integrated Razorpay payment gateway for secure transaction processing
- Implemented OTP-based email verification using JavaMailSender for user authentication
- Generated QR-based tickets for automated validation and improved system efficiency
- Leveraged Cloudinary for scalable media storage and reduced backend load
- Engineered a modular Controller–Service–Repository architecture to improve maintainability and system structure
- Designed efficient relational data models handling 1000+ records with optimized query performance
- Structured backend services in a way that can be extended to support recommendation systems or data-driven personalization features

Real-Time Chat Application

[source code](#)

Tech Stack: React, Node.js, Express, MongoDB, Socket.io, JWT, Tailwind CSS

- Developed a real-time messaging system supporting sub-second message delivery using Socket.io.
- JWT-based authentication, ensuring secure access for 100+ concurrent users.
- Backend APIs managing message storage and retrieval with ~30% faster query performance.
- Built architecture that can be extended to integrate AI-driven chat features such as automated responses or LLM-based assistants.

Hybrid DWT-DCT-LSB based steganography encryption and secure file transfer

[source code](#)

Tech Stack: Python, Flask, HTML, CSS, JavaScript

- Developed a secure file transfer system combining steganography and cryptography for covert communication.
- Implemented hybrid DWT + DCT + LSB technique achieving high imperceptibility with negligible visual distortion (<2% change).
- Applied AES-256-GCM and RSA-OAEP encryption ensuring strong data protection against unauthorized access.
- Integrated Reed–Solomon error correction achieving ~99% data recovery accuracy in noisy transmission conditions.
- Reduced risk of data interception by embedding encrypted payloads within media files.

EDUCATION

B.E. in Computer Science & Engineering

PDA College of Engineering, Kalaburagi

CGPA: 7.5 | Expected Graduation: 2026

Class 12

Shaheen Independent PU College, Bidar

Percentage: 96% | 2021

Class 10

Shadaan High School, Humnabad, Bidar

Percentage: 90.72% | 2019

CERTIFICATIONS

- NPTEL Certification - Privacy and Security in Online Social Media [certificate](#)
- MOOC Course - Cybersecurity (CySecK) [certificate](#)
- Student Training Program - Powering Web & Mobile Applications with Node.js [certificate](#)
